Catherine, Linda and I have composed a letter to the 5902 Sunset developers along the lines that you and I spoke about over the phone on Friday night: asking that they fund a study of traffic conditions along Canyon Drive at Franklin (and potentially a new traffic signal at that intersection) as a means to mitigate the current and future congestion at the Bronson & Franklin intersection. Although it's too late to sit down with them before the Planning Department hearing on December 28th, we were going to send the email off tomorrow. Is that timing good for you? Does that coordinate with your communication with the developers?

Let me know.

Bob Young
Oaks Homeowners Association
